PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in frontend and enterprise application development, REST API integration, workflow automation, and IT operations. Experienced across the software development lifecycle, with exposure to backend development, machine learning, and cloud-native concepts. IEEE-published researcher with experience developing AI-powered assistive technologies and a strong interest in building reliable, scalable, and innovative technology solutions.

TECHNICAL SKILLS

- Programming: JavaScript, Python, Java, C, C++, PHP
- Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS
- Backend & APIs: Node.js, Express.js, Flask, REST APIs, Microservices
- Databases: MySQL, MongoDB, Microsoft SQL Server, SharePoint
- Tools & Platforms: Git, GitHub, Microsoft Power Apps, Power Automate
- AI/ML: TensorFlow, Keras, MediaPipe, Computer Vision, Machine Learning
- Concepts: OOP, Data Structures & Algorithms, SDLC, Agile, API Integration

EXPERIENCE

Fonterra Brands (Lactalis Mainland Dairy) - IT Intern | Application Development & Automation Oct 2025 - Mar 2026

- Developed and maintained enterprise applications using Microsoft Power Apps, Power Automate and SharePoint to support internal business processes
- Participated across the SDLC, including requirements gathering, solution design, development, testing and implementation
- Prepared BRDs, ERDs, user flows and user documentation, and communicated solution functionality through technical presentations
- Supported day-to-day IT operations through device configuration, software installation, and system updates

Aerix Global - Frontend Developer Intern Mar 2025 - Aug 2025

- Developed responsive frontend interfaces for a e-commerce platform using React.js and Tailwind CSS.
- Integrated REST APIs for dynamic features
- Collaborated with developers to troubleshoot application issues, and improve responsive behaviour across devices
- Designed and developed a responsive POS interface
- Used Git/GitHub for version control and contributed to functional testing and issue tracking

RESEARCH & PUBLICATION

IEEE Conference Publication - Interactive Sign Language Learning System with Multimodal Emotion and Interaction Recognition Analysis” Published, 2026

- Developed an AI-powered assistive framework integrating multimodal emotion recognition, gamified sign-language learning, multilingual SSL/ASL recognition and translation, and context-aware hazard detection.
- Technologies: Python, TensorFlow/Keras, React Native, Flask, MediaPipe, EfficientNet-B0, MobileNetV2 and BiLSTM.

2026 IEEE International Conference on Humanoid Robotics and Applications (ICHoRA)

DOI: 10.1109/ICHoRA69329.2026.11537237 | [IEEE Xplore](#)

Final Year Research Project: Interactive Learning and Multilingual Sign Recognition for Hearing-Impaired Children with Emotion Detection and Safety Systems | [GitHub](#)

2025 - 2026

- Developed an AI-powered assistive framework integrating multimodal emotion recognition, gamified sign-language learning, multilingual SSL/ASL recognition and translation, and context-aware hazard detection.
- Technologies: Python, TensorFlow/Keras, React Native, Flask, MediaPipe, EfficientNet-B0, MobileNetV2 and BiLSTM

PROJECTS

Hospital Microservices System | [GitHub](#)

2026

- Developed a microservices-based hospital system supporting appointments, billing, lab services, prescriptions, and role-based access.
- Technologies: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, REST APIs, Microservices

Cloud-Native Food Ordering & Delivery System using Microservices | [GitHub](#)

2025

- Developed a cloud-native food ordering and delivery application based on a microservices architecture, supporting restaurant ordering and delivery workflows.
- Technologies: MongoDB, Express.js, React.js, Node.js, Microservices

Finance Tracking Backend API | [GitHub](#)

2025

- Built a RESTful finance management API featuring role-based access, transaction tracking, budgeting, goal management, financial reports and JWT authentication.
- Technologies: Node.js, Express.js, MongoDB, JWT

Construction Management System | [GitHub](#)

2024

- Developed a MERN-based construction management web application for Shan Constructions, contributing to the Tender Management module.
- Technologies: MongoDB, Express.js, React.js, Node.js

EDUCATION

BSc (Hons) in Information Technology – Specializing in Software Engineering

2022 - 2026

Sri Lanka Institute of Information and Technology (SLIIT)

Diploma in English (2019)

2019

Sabaragamuwa University of Sri Lanka

CERTIFICATIONS

Software Engineering

2026

HackerRank

SQL (Advanced)

2026

HackerRank

Python for Beginners Certificate

2024

CODL, University of Moratuwa
